

# THUY TRAN

Software Developer

Email: [christiesunnie@gmail.com](mailto:christiesunnie@gmail.com)

GitHub: <https://github.com/thuytrantkt>

LinkedIn: <https://www.linkedin.com/in/thuytrantkt/>

## TECHNICAL STACK

- JavaScript
- ReactJS
- TypeScript
- HTML
- CSS, TailwindCSS
- RTK Query
- NextJS
- NodeJS, ExpressJS
- PostgreSQL, MongoDB
- Accessibility (WCAG)
- Responsive Design
- API Integration (REST)
- GitHub Actions
- Jest, Vitest, React Testing Library
- Figma
- Cross-functional Collaboration
- Pair Programming
- Agile Development

## EDUCATION

*Juno College of Technology*

2021

Diploma in Web Development

*Centennial College*

2017-2018

Diploma in Special Event Planning

*Vietnam National University*

2010-2014

B.A in Law

## CERTIFICATIONS

- AWS Cloud Practitioner

## PROFILE

As a passionate software developer, I am dedicated to creating and delivering high-quality products that make a meaningful impact on users' lives. I am constantly seeking new challenges and growth opportunities to enhance my skills, and I thrive in dynamic, fast-paced environments that push me to excel. One of my key strengths is developing responsive and accessible software that provides an exceptional user experience.

## WORK EXPERIENCE

JUNIOR SOFTWARE DEVELOPER

*May 2021 - May 2022*

SOFTWARE DEVELOPER

*May 2022 - Present*

### Deloitte

- Collaborate with product designers and engineers to craft intuitive, high-performance user interfaces that simplify complex workflows and support business goals across the product lifecycle—from discovery to delivery.
- Translate design prototypes into responsive, accessible web experiences, optimized for WCAG compliance, performance, and consistency across modern browsers and devices.
- Develop the modular frontend architecture and implement robust API integration logic to support dynamic, data-driven user interfaces.
- Contribute to design systems and UI component libraries, ensuring consistency, scalability, and seamless developer adoption across multiple products and teams.
- Work closely with fellow engineers through pair programming, mentorship, and technical discussions, promoting engineering excellence and sharing knowledge to support a culture of quality and craft.
- Execute unit, integration, and end-to-end testing using modern testing frameworks to maintain quality and user confidence in core features.
- Streamline build, test, and deployment workflows with GitHub Actions, improving developer efficiency, reducing release friction, and minimizing human error.
- Maintain open communication with stakeholders and cross-functional partners, providing technical input, progress updates, and clarity on implementation decisions.
